

The FreedomCare Difference

With the Employer Mandate in full effect, employers are having to choose a health plan for their employees that will help them stay compliant. Over the past year we have been seeing a lot of shortcomings and even plans that aren't compliant. This isn't the time to take these shortcuts. ACA compliance is a must to protect your company's future.

Not only do we guarantee your ACA compliance, we also include additional features that other companies can't match.

- **No application is needed for enrollment, we are able to auto-enroll employees from a census the employer submits via a secure site.**
- **We handle ALL COBRA administration on behalf of the employer.**
- **A bronze level Minimum Value Plan (MVP) will be offered to all eligible employees. This program has no participation requirements for employers to meet.**
- **In addition to the Minimum Essential Coverage (MEC) and MVP, employees have the ability to design a healthcare package that fits their health and financial needs through additional products available for them to purchase.**
- **Unlimited 24/7 telemedicine program and discount RX program available to all employees at no additional cost.**
- **Return of unused claims funds.**
- **We assist the employer with the completion of required ACA forms.**
- **We supply our exclusive legal guarantee of compliance to employers that choose the Advanced or Preferred programs.**

From day one we haven't taken shortcuts, we don't plan to start now. Our administration services can't be beat.
